Emily Stone gives a tour-de-force performance in the gripping psychological thriller, *Compulsion*, as a young college student who becomes dangerously obsessed with her studies and descends into insanity.

Stone plays Amy Elliott, a brilliant but troubled young woman who is driven to succeed at all costs. She spends countless hours studying, neglecting her health and relationships in the process. As her obsession intensifies, Amy's behavior becomes increasingly erratic and self-destructive. She develops anorexia, cuts herself, and even attempts suicide.

Compulsion is a harrowing and unflinching look at the devastating effects of obsession and mental illness. Stone's portrayal of Amy is both heartbreaking and terrifying, as she vividly captures the young woman's descent into madness.

The film is also a powerful indictment of the pressures that are placed on students in today's competitive academic environment. Amy's story is a cautionary tale about the dangers of pushing oneself too hard and sacrificing one's well-being in the pursuit of success.

### **Emily Stone's Performance**

Emily Stone gives a truly remarkable performance in Compulsion. She completely disappears into the role of Amy, capturing the character's intelligence, vulnerability, and desperation with equal skill.

Stone's performance is all the more impressive because she herself has struggled with mental health issues in the past. She has spoken openly about her experiences with anxiety and depression, which gives her a deep understanding of the character she plays in Compulsion.

In an interview with The Hollywood Reporter, Stone said that she was drawn to the role of Amy because she wanted to explore the character's inner demons. "I've always been fascinated by people who are driven to the point of self-destruction," she said. "I wanted to understand what motivates them, and what happens when they finally reach their breaking point."

Stone's performance in Compulsion is a testament to her extraordinary talent and her commitment to her craft. She has created a truly

unforgettable character that will stay with audiences long after the credits have rolled.
